GRIP STUDS™

Wader Boots

EXTREME TRACTION for

Increase traction in wader boots with Grip Studs™ easy-to-install traction studs. Solid tungsten-carbide tip and wide thread base deliver dependable, durable performance.

Grip Studs™ Advantage

Installation Tool

Grip Studs™ solid tungsten-carbide tip won't wear down easily like sheet metal screw heads.

Grip Studs™ installation notches won't wear away, providing easy optional removal.

Grip Studs™ wide-auger thread design ensures a secure, solid fit, unlike narrow-thread sheet metal screws which can easily back out with use.

Grip Studs™ shallow penetration and unique thread width prevent puncture, ensuring safe and comfortable wear.*

*Always check sole thickness before installing studs.

Sheet Metal Screw Disadvantage

Stud Penetration into Sole: 7.9mm
Stud Protrusion from Sole:
Standard Stud 1.9mm Aggressive Stud 4.3mm

STANDARD PACK

For standard fishing conditions such as river banks or moderately flowing streams and rivers.

1100WK20
